(D)

In order to deduct a reserve for doubtful debt or write off a bad debt, an amount in respect of the debt must have been included previously in income. This is not the case, if accounts receivable had been purchased from someone else. Where a person has sold all or substantially all of the property used in a business to a purchaser who will continue the business, section 22 provides for a joint election by the vendor and purchaser which results in permitting the purchaser to take the reserve or write-off with respect to the accounts receivable.

Under section 22, the purchaser must include in income the difference between the face amount and amounts paid. This inclusion will allow the purchaser to deduct a reasonable reserve for doubtful debts on the accounts receivable purchased and to deduct any bad debts as they occur.

The vendor, regardless of whether section 22 is used, must add to income the reserve for doubtful accounts. Under section 22, the vendor would have a business loss with respect to the disposition of the accounts receivable.

If section 22 is not used, any loss on the disposition of the accounts receivable would be considered a capital loss, and any loss realized by the purchaser on the collection of accounts receivable will be a capital loss with no reserve or write-off permitted to the purchaser.

—NOTES TO SOLUTION

(1) The reserve for doubtful accounts of \$1,500 must be added to income regardless of whether a section 22 election is used.

If a section 22 election is used, the excess of face amount over proceeds of \$2,750 would be a business loss such that the net effect on income would be a \$1,250 business loss.

(2) Income/loss from business is the difference between the fair market value and the cost of inventory. In this case such a loss results due to:

Fair market value (proceeds).....	\$ 15,500
Cost of inventory.....	<u>22,250</u>
	<u>\$ (6,750)</u>
